

**ENDYMED™**  
3DEEP SKIN SCIENCE

# ENDYEye

The complete non-invasive  
eye solution

**TREAT ALL EYE CONCERNS  
WITH A SINGLE PLATFORM**

# OPEN YOUR EYES TO NEW POSSIBILITIES

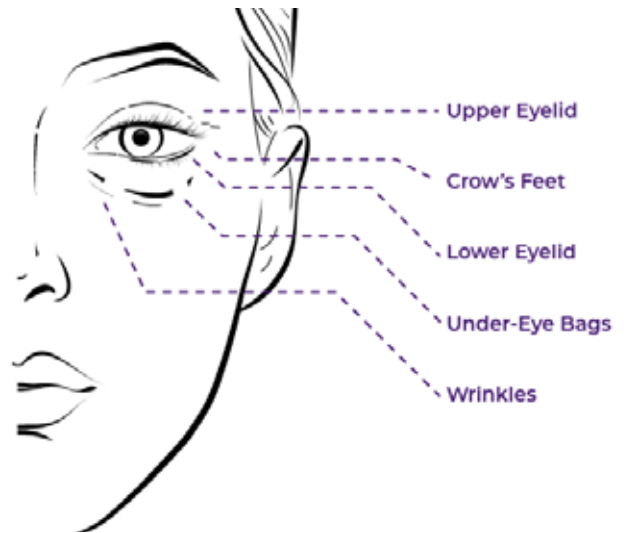

The skin around the eyes is one of the first areas to show signs of aging as laughter lines, crow's feet, dark circles, and drooping eyelids start to appear.

According to ASDS, **70%** of consumers have concerns about lines and wrinkles in this area, which is one of the thinnest and most sensitive areas of the body.

**ENDYEye redefines periorbital rejuvenation.** It is a complete, safe and effective non-surgical solution for all your patients' eye area concerns that's powered by a unique combination of fractional and focused 3DEEP RF technologies. No pain or downtime; just beautiful results.

## Open your eyes to a bright future

ENDYEye is a complete eye solution that provides new possibilities for you to expand your clinic offering and grow your patient base. This scalable and upgradable platform not only has the flexibility to treat all eye concerns but can also be used for a variety of skin and body indications. No wonder ENDYEye is the platform of choice for so many physicians around the world.

### Open your eyes to a complete non-surgical solution

Treat all periorbital concerns effectively with a single platform

### Open your eyes to innovation

Specially designed to treat the delicate skin and hard-to-reach areas around the eyes with fractional minimally ablative technology

### Open your eyes to safety

Suitable for all skin types, all year round

## How does the ENDYEye platform work?

ENDYMED's innovative non-surgical technology is designed for the 21st century practice. ENDYEye uniquely combines three advanced technologies in one platform for ultimate results: 3DEEP® Focused Radiofrequency, RF Radiofrequency and Fractional Skin Resurfacing.

3DEEP® RF energy is delivered into the skin to stimulate skin tightening for an instant lift, while micro-

**Focused RF Volumetric Heating**  
Treats all areas around the eyes in just 2-3 minutes. Ideal for skin tightening and lifting and areas that are otherwise difficult to reach.

**Fractional RF Skin Resurfacing** Mini  
ablation of the epidermis for skin  
rejuvenation and a glowing effect.

**RF Microneedling**  
Localized micro-injury for skin  
remodeling and collagen renewal.  
Effective for treating fat pads at the  
infra-orbital area. Penetration depth  
of up to 1.5mm.

Utilizing the iFine and the Intensif applicators has helped many of my patients with improving the wrinkles, contours, as well as lifting the eyes, all non-surgically. The ENDYEye system gives our patients an alternative to surgery, which in today's world, is very important to minimize downtime, yet seeing impressive results.

**Michael H. Gold**  
MD, USA

### Open your eyes to comfort

A quick lunch time treatment for patients with minimal pain and downtime

### Open your eyes to superior results

With high patient satisfaction

# ENDYMED: the Difference is 3DEEP®

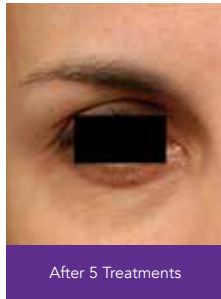

**1 A Premium Brand:** ENDYMED Medical is a worldwide-recognized brand with an extensive global presence.

**2 Our Partnership Advantage:** exceptional service, flexible upgrades and comprehensive training.

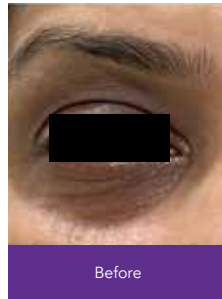

**3 Extensive marketing support:** collateral to help your practice grow with a high return on investment from the very start.
