

A woman is shown from the waist down, crouching in a graceful pose. Her legs are crossed at the ankles, and her arms are resting on her thighs. The background is a solid, bright white. Overlaid on the center of the image is a semi-transparent purple rectangle containing white text.

ENDYMED™  
3DEEP SKIN SCIENCE

# Body Tightening and Sculpting

by EndyMed

EndyMed offers the most comprehensive and clinically proven body treatment system available today. Pairing the powerful PRO Treatment Platform together with our most innovative body treatment handpieces, EndyMed provides the most in-demand, superior body tightening, sculpting, and cellulite reduction treatments, with no downtime or discomfort, and with very high patient satisfaction.

EndyMed's non-invasive body treatment technology provides deeper, controlled and focused energy penetration that tightens and contours, with superior collagen remodeling for better, safe and comfortable treatments with clinically proven results.

Shaper

Mini-Shaper

Contour

## Contour - 3DEEP RF + Vacuum Technology for the Ultimate in Cellulite Reduction

The innovative Contour combines the power of focused 3DEEP™ energy with the benefits of tissue lifting vacuum to substantially increase the energy delivery and volumetric heating of the treatment area. This allows the RF energy to achieve higher treatment temperatures, which results in superior body tightening and contouring, and truly effective cellulite reduction.

Before Contour Treatments

After 5 Contour treatments

### Contour features:

- Unique controlled vacuum doubles the deep heating volume for enhanced treatment effectiveness
- New modulated massage function for optimal cellulite reduction results
- Precise power and vacuum digital controls are located on the handpiece for easy treatment experience
- Real time temperature tissue impedance monitoring – the best in the industry

## Shaper - Focused RF for Superior Body Sculpting

The Shaper is the ideal solution for sculpting larger body areas, such as the abdomen, buttocks and thighs. The Shaper's unique six concentric electrodes are controlled simultaneously to maintain better volumetric heating in the treatment area, maximizing the focused 3DEEP RF energy effect, tightening lax skin, sculpting and contouring the body, and reducing body circumference.

Before Shaper treatments

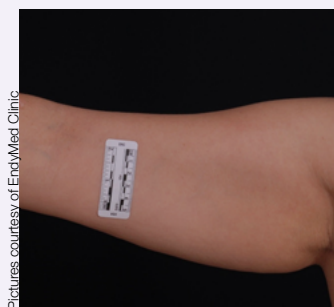

After 9 Shaper treatments

### Shaper features:

- Superior body tightening and sculpting for the waist, abdomen, peri-umbilical area, buttocks, hips, inner and outer thighs
- Unique electrode surface allows for shorter treatment times
- Minimum energy loss on the skin surface due to the concentric geometry of the electrodes

## Mini-Shaper - Unique Design For Effective Arm and Knee Treatments

The innovative Mini-Shaper handpiece, with its unique concentric electrode surface, provides focused 3DEEP energy deep into the skin for maximum results. Perfect for treating arms and knees, the Mini-Shaper offers nearly twice the power than other similar sized RF handpieces in the market, and maintains tissue heat longer after the treatment is complete.

Before Mini-Shaper treatments

After 3 Mini-Shaper treatments

### Mini-Shaper features:

- More powerful, shorter treatment times – up to 50% faster treatments
- Reaches and maintains higher tissue temperature for optimal collagen remodeling
- Specifically designed to treat smaller, hard to treat areas
- Provides superior volumetric heating, with deeper average heating depth

## About 3DEEP® RF Technology

ENDYMED's 3DEEP technology is the most powerful and focused skin technology available today. Unlike Monopolar or Bipolar RF technology, which is more superficial and can often be painful or risky to the epidermis, 3DEEP delivers controlled energy to the depth of the dermis, reaching 52°-55°C, with minimal epidermal heat. This is achieved through gently focusing the device energy into the dermis for optimal, painless collagen remodeling.

ENDYMED's 3DEEP technology incorporates real time skin impedance monitoring, providing the most optimal energy to the treatment target area by making continuous adjustments based on the tissue impedance over the current treatment area.

## About ENDYMED MEDICAL

ENDYMED MEDICAL, (ENDY:TASE), established in 2007, offers energy based medical aesthetic treatment systems for both the professional and consumer markets. ENDYMED's proprietary, FDA cleared 3DEEP® radiofrequency technology is a highly effective solution for non-ablative and fractional wrinkle treatment, RF microneedling, skin tightening on the face and body, body contouring, circumference and cellulite reduction, and acne and traumatic scar treatment.

ENDYMED's unique, patented 3DEEP technology delivers RF energy 3 layers deep into the skin, without any pain or risk, reactivating the natural collagen production to remove wrinkles and noticeably lift and tighten the skin.
