ENDYMED Fractional RF Technology – Setting New Industry Standards

ENDYMED offers the most advanced fractional RF technology available today, providing clinically proven safe and effective fractional RF technologies all on one treatment platform. Combining unique Fractional RF technology with patented 3DEEP RF volumetric heating, ENDYMED's Fractional treatment handpieces provide superior results with minimum downtime.

The ENDYMED Intensif

The ENDYMED Intensif is the first FDA cleared motorized microneedle RF technology in the market. Powered by ENDYMED's unique 3DEEP™ fractional RF technology, the Intensif stands out amongst other microneedle technologies with its exclusive, smooth and fast operating mode.

The Intensif Advantages:

- 1** Unique smooth gliding needle insertion motion is like no other microneedle applicator today, offering fast and comfortable continuous operation mode
- 2** Sophisticated electronics minimize epidermal damage while allowing full, deep volumetric dermal heating
- 3** Unique gold plated needles, together with ENDYMED's proprietary Fractionated Pulse Mode technology, generate more heat safely into the dermis for better collagen remodeling
- 4** Intensif's unique treatment tip requires less passes per treatment for shorter treatment times and greater patient comfort

Intensif offers complete treatments with no bleeding or bruising

FSR by ENDYMED

Fractional Ablation + 3DEEP Deep Heating for Superior Results

Fractional Skin Resurfacing by EndyMed, with unique 3DEEP Smooth Scanning technology, provides the ultimate in skin resurfacing and rejuvenation, wrinkle reduction, tightening and scar reduction treatments. The FSR applicator combines superior fractional ablation with 3DEEP volumetric heating for the most effective and easy treatments, particularly in delicate-skin areas.

FSR Advantages:

- Superior depth of penetration – at 2.9mm, the best in the industry
- Fully customizable treatment parameters provides complete control of the ablation and coagulation capacity
- Clinically proven consistent and predictable results
- Minimal to no downtime after treatments
- Immediate and long-term results
- Largest variable treatment area in the industry – maximum coverage with minimal discomfort
- Safe for all skin types and colors

Flexible Combination Treatment Protocols

EndyMed's Intensif + FSR combination protocol provides superior skin resurfacing together with deep wrinkle reduction for exceptional results. See the difference:

About 3DEEP® RF Technology

ENDYMED's 3DEEP technology is the most powerful and focused skin technology available today. Unlike Monopolar or Bipolar RF technology, which is more superficial and can often be painful or risky to the epidermis, 3DEEP delivers controlled energy to the depth of the dermis, reaching 52°-55°C, with minimal epidermal heat. This is achieved through gently focusing the device energy into the dermis for optimal, painless collagen remodeling.

ENDYMED's 3DEEP technology incorporates real time skin impedance monitoring, providing the most optimal energy to the treatment target area by making continuous adjustments based on the tissue impedance over the current treatment area.

About ENDYMED MEDICAL

ENDYMED MEDICAL, (ENDY:TASE), established in 2007, offers energy based medical aesthetic treatment systems for both the professional and consumer markets. ENDYMED's proprietary, FDA cleared 3DEEP® radiofrequency technology is a highly effective solution for non-ablative and fractional wrinkle treatment, RF microneedling, skin tightening on the face and body, body contouring, circumference and cellulite reduction, and acne and traumatic scar treatment.

ENDYMED's unique, patented 3DEEP technology delivers RF energy 3 layers deep into the skin, without any pain or risk, reactivating the natural collagen production to remove wrinkles and noticeably lift and tighten the skin.

The efficacy of EndyMed's fractional RF technology has been proven repeatedly in published peer reviewed clinical papers by top luminaries and internationally renowned dermatologists
