

MICRODERMAL NEEDLING

The Latest Innovation in Fractional Microdermal Needling

MDPen™ MicroNeedling is a safe, effective and minimally invasive procedure. Results include glowing, smoother and younger-looking skin but without the downtime or trauma that is associated with laser or chemical treatments.

Two Unique Needles: One Amazing Result!

Restore

The Restore needlehead features 12 standard micro needles for treating the face and body.

Refine

The Refine needlehead features 160 mini micro needles for performing more superficial treatments.

Two Pen Choices: Electric or Cordless

Electric

The electric version of MDPen™ offers a powerful motor and up to 17,500 RPMs, resulting in greater ease of treatment and increased comfort for the patient.

Cordless

Now, you can move about freely while treating your patients. The cordless version of the MDPen™ can operate up to 11,500 RPM, has a lithium-ion battery, and offers 4 hours of treatment usage with a 45-minute charge.

We support your success!

Prepare Your Team with Our Training and Treatment Protocols

With your MDPen™ purchase, you will receive up to three seats in our online certification training course offered by our partner, PracticalCME; complimentary registration to any of our Advanced MicroNeedling Workshops held around the country; and treatment protocols, patient consent forms, and a treatment log to help you manage your MDPen™ practice. For an additional fee, you can have one of our licensed aesthetic educators come to your office and give a 4- to 5-hour hands-on training for your staff.

Reach your target market with professionally designed MDPen™ marketing templates!

As an MDPen™ customer, you will receive marketing templates for creating print ads, appointment cards, postcards and other materials with your purchase. The marketing templates can be customized with your contact information and logo.

MDPen™ Practitioner Testimonial

"MicroDermal needling is now a big part of our practice. Our staff performs 10 to 15 MDPen™ treatments per week. We have found MDPen™ to work for many different applications and skin types. Patients are pleased to know that there is no real downtime after a procedure, which allows them to resume normal activities quickly. MDPen™ is a simple, painless way to get dramatic results with a non-ablative device."

Dawn Barngrover, RN and Spa Co-Owner
Southeast Regional Med Spa, Georgia

MDPen™ Patient Testimonial

"I've had two microneedling treatments... best thing I ever did! Before this procedure, my skin was dull, blotchy and scarred from cystic acne. With the exception of just a little redness, the treatment was virtually painless. I now have the complexion I always wanted thanks to microneedling."
